EXPERIENCE

Web Designer - East Bay Wildlife Connectivity Project

Sept 2026 - Present | Oakland, CA

- Designing and developing a new website for a regional wildlife conservation project, translating project information, research, and provided imagery into a clear and approachable website for the public.
- Developing the site's visual system, page layouts, and responsive designs in Figma before building the site in WordPress, with attention to accessibility, organization, and ease of use.

Multimedia Designer Western Pond Turtle Collaborative

Jan 2025 - Present | Livermore, CA

- Created illustrations, field photography, apparel graphics, and stickers to communicate the organization's wildlife research and conservation work to both scientific and public audiences.
- Currently redesigning the organization's website, developing page layouts and visual content that bring together research, photography, and educational information in a more engaging and accessible format.

Graphic Designer - Freelance

Sept - Nov 2025 | Remote

- Collaborated directly with company leadership to develop a logo and visual identity from initial concepts through refinement and final delivery.
- Developed and refined multiple design directions based on client feedback, creating adaptable assets for digital, print, apparel, and other applications.

Lead Designer - BARCA (Bioarchitecture + Art Revitalization + Chamorro Assemblage)

March - June 2023 | San Diego, CA

- Co-led the design and fabrication of a large-scale public art installation, collaborating through concept development, critiques, and changing project requirements.
- Adapted design solutions to stakeholder needs and real-world material, fabrication, and installation constraints.
- Communicated design concepts across a multidisciplinary team while balancing creative goals with practical limitations.
